Re: Ex Parte Presentation in *Unbundled Access to Network Elements; Review of the Section 251 Unbundling Obligations of Incumbent Local Exchange Carriers*, WC Docket No. 04-313, CC Docket No. 01-338

Dear Ms. Dortch:

On October 14, 2004, undersigned counsel and Jake E. Jennings, Vice President for Regulatory and Industry Affairs for NuVox Communications ("NuVox") met with the following: Jeremy Miller, Assistant Chief of Competition Policy Division; Cathy Zima, Acting Deputy Division Chief of Industry Analysis and Technology Division; Russell Hanser, Special Counsel to the Chief of Competition Policy Division; Timothy Stelzig, Attorney Advisor in the Wireline Competition Bureau; Ian Dillner, Attorney in the Wireline Competition Bureau; Gail Cohen and Marcus Maher of the Competition Policy Division; Eric Boone, Attorney Advisor in Office of Strategic Planning Division; and Christina Langlois and Carol Simpson of the Wireline Competition Bureau. The purpose of the meeting was to discuss the FCC's consideration of new unbundling rules in the above-captioned proceedings, and the positions asserted were consistent with NuVox's prior filings in these proceedings. During the meeting, a confidential version of the attached presentation, which has been redacted for public review, was provided for discussion.

A confidential version of the attached presentation is being submitted via hand delivery under a separate cover pursuant to the Commission's August 20, 2004 order in the above-referenced dockets.

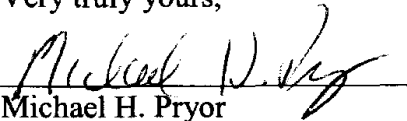

No. of Copies redacted 014

Pursuant to Section 1.1206(b)(1) of the Commission's rules, a cover letter with four copies of the confidential version of this presentation and a cover letter with four redacted copies of the public version are being filed with the Office of the Secretary. Please date stamp the enclosed return copy and return it in the envelope provided. If you have any questions relating to this filing, please contact the undersigned.

Very truly yours,

Michael H. Pryor
Counsel to NuVox, Inc.

TRO Remand Presentation

October 14, 2004

National Finding of Impairment for DS1 Loops

- CLECs cannot overcome entry barriers to self deploy local loops to serve customers at the DS1 capacity level; the revenue opportunity is too limited.
- Opportunities to obtain wholesale DS1 loops are extremely limited – non-existent in most places.
- Attempting to ferret out those isolated instances where DS1 wholesale loops may be available is administratively burdensome and unnecessary, especially given *USTA II*'s acknowledgement that there will inevitably be some over or under inclusiveness in any rule.
- There are no economic criteria by which one could extrapolate when it is possible to self deploy DS1 loops or obtain wholesale DS1 loops.

National Finding of Impairment for DS1 Loops (cont.)

- The presence of fiber does not usefully inform the question of impairment for DS1 loops.
 - ✦ The BOC's channelization argument does not reflect market realities; as amply demonstrated by the sworn testimony of both fiber carriers in a position to provide access and by facilities-based carriers seeking such access.
 - ✦ Fiber will not be deployed in the first instance to serve a customer just with a DS1.
 - ✦ At most, carriers that have already deployed fiber to a location may find it economical in some instances to also provide DS1 capacity to their customers at that location.
 - ✦ No evidence in the record demonstrates that carriers that have constructed fiber to a building make wholesale DS1 circuits available over that fiber, except for – at most -- very isolated exceptions. *See* QSI Study at 15 (36 Buildings in 12 states met DS1 loop wholesale trigger).

Impairment Analysis for DS1 Loops Applies to DS1 EELs

- A DS1 EEL is a combination of a DS1 loop and a DS1 transport.
- The ability to overcome entry barriers is the same with a DS1 EEL as with a DS1 loop.
 - ✚ A DS1 EEL does not aggregate traffic from multiple carriers.
 - ✚ Revenue opportunity is limited to that generated from a single, typically small business customer.
 - NuVox average revenue is \$500 to \$700/per month.
 - Cbeyond is \$500/per month.

Impairment Analysis for DS1 Loops Applies to DS1 EELs (cont.)

- DS1 Transport is not available to replace the EEL transport component.
 - ✦ The record demonstrates that DS1 wholesale transport is virtually non-existent. The QSI Study found that only 49 routes met DS1 wholesale transport triggers in 14 states.
 - ✦ Unique difficulties exist with EELs, which are end-to-end circuits with limited revenue with which to pay for transport.
 - Carriers require a substantial revenue commitment to build to NuVox's collocation or switch.
 - Even if a carrier is collocated at the wire center where the loop terminates and at the wire center where NuVox is collocated, use of such a carrier increases costs and points of failure.
 - Bell Companies must have processes to cross connect a NuVox-ordered DS1 loop with third-party transport providers.

CLECs Are Impaired without Access to ILEC Loops Used To Serve Small Business Customers

- Impairment determinations may be based on customer class as well as capacity.
 - ✦ Customer distinctions have previously informed the Commission's impairment analysis.
 - The Commission made distinctions between mass market and enterprise customers; and
 - Between large enterprise customers that can be served economically over self deployed highest capacity loops (OCn and multiple DS3s) and small business customers that cannot economically be served over self deployed DS1 loops.

CLECs Are Impaired without Access to ILEC Loops Used To Serve Small Business Customers (cont.)

- ✚ Characteristics of small business market indicate impairment.
 - Limited revenue, short-term contracts, high churn.
 - Require sophisticated, high quality services.
 - Marketed through one-on-one visits.
 - Lack of intermodal alternatives.
- ✚ Intramodal competition is critical for maintaining competition for small businesses, which are significant drivers of the overall economy.
 - MICRA study showed \$5 billion impact on small business if UNEs are eliminated.
- ✚ CLECs should have access to ILEC loops for small business, regardless of loop technology (*see TRO n.956*).
- ✚ The small business customer class is effectively defined as those receiving capacity between the DS1 and 2 DS2 level of bandwidth.

Special Access Is Not a Substitute

- EELs are not concentrated in Wire Centers with high Special Access revenue.
 - ✦ NuVox evidence of wire centers in price flex MSAs demonstrates EELs are widely dispersed. (See tables on following two slides).
 - ✦ Use of the MSA-wide market definition would eliminate unbundling in many areas where there are no alternative providers.

REDACTED – FOR PUBLIC INSPECTION

Special Access Is Not a Substitute (cont.)

- NuVox's entry into local market to serve small and medium-sized businesses is based on UNEs not special access.

Market Entry Coincides with UNE Access

REDACTED – FOR PUBLIC INSPECTION

Special Access Is Not a Substitute (cont.)

- Special access rates are substantially higher than TELRIC rates, especially for the transport component of EELs.

UNE/EEL Pricing vs. Special Access Pricing

Atlanta MSA

UNE Density Zone 1, SPA Density Zone 1 MSA Price Flex (Full Relief)

Element	EEL USOCs	EEL Rate	SPA USOCs	SPA MTM	SPA 49 Mos.	BellSouth Tariff Ref
Channel Termination (DS1Loop)	USLXX	\$41.02	TMECS	\$168.00	\$123.00	FCC #1 23.5.2.9(A)(1)
Mileage @ 10 miles	1L5XX	\$1.15	1L5XX	\$180.00	\$80.00	FCC #1 23.5.2.9(B)(2)
Interoffice Channel Fixed	U1TF1	\$34.19	1L5XX	\$85.00	\$65.00	FCC #1 23.5.2.9(B)(2)
COLO Cross Connect	PEIP1	\$0.37	PEIP1	\$2.65	\$2.65	FCC #1 13.3.23 (B)(1)
Total		\$76.74		\$435.65	\$270.65	

Special Access Is Not a Substitute

UNE/EEL Pricing vs. Special Access Pricing
Greenville SC MSA
UNE Density Zone 1, FCC Density Zone 2 MSA Price Flex (Limited Relief)

Element	EEL USOCs	EEL Rate	SPA USOCs	SPA MTM	SPA 49 Mos.	BellSouth Tariff Ref
Channel Termination (DS1Loop)	USLXX	\$79.51	TMECS	\$175.00	\$123.00	FCC #1 7.5.9(A)(1)
Mileage @ 10 miles	1L5XX	\$3.42	1L5XX	\$186.50	\$54.50	FCC #1 7.5.9(B)(2)
Interoffice Channel Fixed	U1TF1	\$77.14	1L5XX	\$80.00	\$70.00	FCC #1 7.5.9(B)(2)
COLO Cross Connect	PEIP1	\$1.12	PE1P1	\$2.65	\$2.65	FCC #113.3.23(B)(1)
Total		\$161.19		\$444.15	\$250.15	

Special Access Is Not a Substitute

UNE/EEL Pricing vs. Special Access Pricing Wichita MSA UNE Density Zone 3, SPA Density Zone 2 non-MSA Pricing

Element	EEL USOCs	EEL Rate	SPA USOCs	SPA MTM	SPA 5- YR.	BellSouth Tariff Ref
Channel Termination (DS1Loop)	U4D1X	\$64.78	TMECS	\$185.00	\$102.90	FCC #73 7.3.10(F)(1) & 7.3.10(F)(10.3)(a)
Mileage @ 10 miles	ULNHS	\$3.50	1L5XX	\$155.00	\$88.50	FCC #73 7.3.10(F)(2) & 7.3.10(F)(10.3)(b)
Interoffice Channel Fixed	ULNHS	\$46.86	1L5XX	\$60.00	\$34.00	FCC #73 7.3.10(F)(10.3)(b) & 7.3.10(F)(2)
COLO Cross Connect	UCXHX	\$7.12	SP1A1	\$4.64	\$4.64	FCC #73 25.7.5(A)(1)
Total		\$122.26		\$404.64	\$230.04	

Special Access Is Not a Substitute

- Special access mileage rates are even more anticompetitive in price flex MSAs.

Comparison of Price Flex and Non-Price Flex Rates*

	Month-to-Month		Discounted	
	Non-Price Flex	Price Flex	Non-Price Flex	Price Flex
Local Channel	\$168.00	\$168.00	\$120.00	\$123.00
Interoffice Per Mile	\$16.00	\$18.00	\$3.90	\$8.00
Interoffice Fixed	\$75.00	\$85.00	\$65.00	\$65.00

*See NuVox's comments in this proceeding at Page 44 of both its confidential and redacted filings.

Special Access Prices Dramatically Increase Cost

REDACTED

Effect of Special Access Rates

- BOCs claim diminution of profitability by having to use higher priced special access does not lead to impairment.
- Special Access rates do more than reduce profitability, they increase NuVox's network costs from [REDACTED], sending EBITDA into the red. (See chart on following slide).
- Overall costs increase by approximately [REDACTED] compared to the total monthly revenue of approximately [REDACTED] dollars.

Special Access Is Not a Substitute

REDACTED

Unlike EELs Special Access Undermines Facilities-Based Competition

- The Commission found in the *TRO* that EELs promote facilities-based competition and innovation.
- Special Access discount plans lock in demand and impede the ability of carriers to move to third party providers or to self-deploy.
- Special access tariffs are designed to keep carriers on BOC networks by imposing substantial penalties for decreasing committed traffic.
